Subject: RE: Dossier

We are now doing a note now giving the detail on Iraq and AQ. [redacted]
[redacted] but more complete [redacted]

The dossier mentions about eight sites. There are dozens more which could be relevant. At least one of the eight (the engine test stand for long range missiles) would not be easy to stage manage without dismantling the stand i.e. this would be progress. The dossier stresses the dual-use problem and the ease of concealment. This applies to trained inspectors let alone journalists. We ought to be able to work out lines to tackle this issue up front.

Subject: Dossier

The dossier is good and convincing for those who are prepared to be convinced.

I have only three points, none of which affect the way the document is drafted or presented.

First the document does nothing to demonstrate a threat, let alone an imminent threat from Saddam. In other words it shows he has the means but it does not demonstrate he has the motive to attack his neighbours let alone the west. We will need to make it clear in launching the document that we do not claim that we have evidence that he is an imminent threat. The case we are making is that he has continued to develop WMD since 1998, and is in breach of UN resolutions. The international community has to enforce those resolutions if the UN is to be taken seriously.

Second we will be asked about the connections with Al Qaeda. [redacted]

[redacted] given the different [redacted]

Third, if I was Saddam I would take a party of western journalists to the Ibn Sina factory or one of the others pictured in the document to demonstrate there is nothing there. How do we close off that avenue to him in advance?
