thanks David, very nice to see you too. I have asked the MOD about access to the work of the ISG and will follow up today with a specific request to see if we can include you. I am also in touch with CentCom about the logistics and access on the ground. They tell me [REDACTED] as left Iraq and I think things look quite good for me to get some access now. Can you let me know as soon as you have any timings on activity - either involving yourself or others. It would help me to push. Also following our discussion about destructive sampling I hear that it might start as early as this week which is why I would like to get out there and film the labs before their physical appearance changes too much!

Will call [REDACTED] today.
Best wishes
