MEMO

20030626 kelly 22 5.03 in one of the jan - chemical reactors not destroyed by unscm, gla lined chamber to promote chme rections - were being used again by the iraqis, recovered, taken at al muthanna, not properly destroyed by u n, recovred y iraqis, taken to fallujah, and used for no-banne ed purposes.

the 18 chem missiles wre reported by blix, but do wnplayed. blix thought they wre leftovers

i thin it 30pc lk eely that iraq had active cw prog in the 6 m to a year likely that ther was

not much coming out of detainees, despite finan cal inventives...they are

the dossier was transformed in the e wk before it was published, to make it sexier the classic w eas the 45 mins mst thngs in dossier wre sdbl sc but that was e single-source one source said it took 4 minutes to set up a m issile assembly and that was msinterpreted

conv not wmd, n eo ev missiles loaded

most people in intel werent happy with 1 et, beause it didnt refect the considere view they were putting e forward

campbell

real but not relable, agaisnt wishes

10-1 e5 yrs go there was a lot of info, with the concealment and decep tion op there was far less infomration

war was a tragic failu e of diplomacy, no direct ffort to engg iraq it was a footbal el for everyone

it was small because you dnt conceal a lg prog e, and because it was actually quite hard to impoort things.

the e e sanctions were effective, they did limit programme

there has e been proliferation - not in terms of people walking across th ee iraqi border with 20 shells, but supply chain knowledge, -plan es

isg headed by a major general, below him 2 one starts, brit eish an australian

we dont have a gt deal of knowldege than we e had before

1500 - 100 brits, 10-20 aussies- not all experts, e about 20 of the brits are

it is a big handicap not to be abl ee to draw on the eertise of russian and german et expts

isqy ba y
