

**NOTES OF SECOND MEETING BETWEEN ANDREW GILLIGAN AND DAVID
KELLY OF 11 APRIL 2002**

"Other mems"

Didn't come clean in '95

We had a period of apparent co-op between 8/95 - 2/96

Saddam thought a data dump wd satisfy the UN

Has abandoned El-Hakim - destroyed

We suspect other plants: they have eqpt (albeit in small quantities)

UNA/CD 4

Tareq: Missile plant

There is efficient info coming out since '98 to make us concerned:

People we were interested in were maintained as teams.

Military/Industrial commission remains the apple of SH's eye.

Programme continues - quite ambitious -

Actual wpns small plus crude. Have (or could CD have) something within 6 mmo.

Main capabil wd be phsycolgical - no hugely destructive attack poss.

See all int - tell them what it means!

No smoking guns - nothing you wouldn't know.

A bit of agent they haven't admitted - have imported small quantities of plague vaccine.

A few Russian scuds unaccounted for - 2 of 819, poss more

Plus - minus 50 indigenous

Rather uneventful - not much in it - so delayed

Kelly role to advise on all CBW claims in dossier.

Thread equals capabil plus intention. Intention lacking - too much to lose w/terrorists etc.

BW prog - absolutely no evidence of FGN involvement.

ALIBEK has claimed there was, but Kelly does not believe.

None of the BW facs looked @ by UNSCOM were hit in DF

Missile facs were hit & one chemical plant @ Faluja
