**Subject:** RE DOSSIER - IRAQ

[REDACTED]

I have just spoken to Dr David Kelly (ex UNSCOM BW and cleared) about the growth media amount page 8 top para line 2. It states UN inspectors could not account for up to 20 tonnes of growth media. In fact 2 456 tonnes was missing. UNSCOM could not account for a further 15 457 tonnes which Iraq claimed it used in BW work. But Iraq has not revealed its production documents therefore this amount is unaccounted for. The existing wording is not wrong - but it has a lost of spin on it!
