

Attachment C - Susan Watts Notebook 46 - telephone conversation on 12th May 2003.

Shorthand notes transcribed exactly - that is, not for sense, but symbol-by-symbol.
For sense, please see witness statement.

My notes to myself are in bold Dr Kelly's words are in italics.

Kelly (underlined in book)

process engineer

. 90% fermentor (down to indicated by arrow) 40 to 50%...don't have all information. Not aware of anyone who does.

...not the sort of fermentor Iraq had used in the past

partial info Features I need to see

.. robust (this word no longer meaningful to me)

.. but if pesticides, would be lightweight. I think there's confusion Years ago used to be, in microbiology, pesticides business (oil can...caterpillars, die, mush. .spray) ..confusing this with that

...have seen photographs But not a process diagram One thing to know whether the bits are connected.

15th May Central Command. Relinquish ("to" - indicated by arrow) ISG put in place

.has to be clarity (meaning unclear to me now)

..montage but no systematic ...photography (meaning unclear to me now)

Kelly (underlined in book)

Iraq's policy was "fill-to-use"

JIT - yes that's been his view all along.

Empty munitions...122mm...found 18 but didn't follow it up

...Rashid Amir (meaning unclear to me now)

...committee but no UNMOVIC rep. Didn't report back. UNMOVIC should have asked for the documentation.
