Subject: VS: still not getting through..?

)
Dear Bryan Rose, here are the emails in chronological order, the first from the 19th of march. unfortunately i got the month of our meetings wrong, we met in early and mid-april, not in may! I have the exact dates in my diary, I will bring it if you wish to speak to me in september.

I have pasted Dr Kelly's emails, my original email is usually below his reply.

I wish you and your colleagues all the best of luck with your work - as you know it is seen as very important by a lot of people, me included
best
Målfrid

Dear Mr Braut,

)
I will be happy to let you know what I know about UNSCOM and UNMOVIC. I suggest that you call me on [redacted]. With war imminent it may be difficult to arrange to meet over the next few weeks!

Sincerely,

Dr David C. Kelly, CMG
Senior Adviser,
Proliferation & Arms Control

Ministry of Defence,

Subject: verification and

monitoring research

Dear David Kelly,
 my name is Målfrid Braut, and I am a postgraduate student at the London School of Economics. I was given your email address by Julian Perry Robinson, who suggested I should contact you in relation to my research. I am writing my Msc dissertation about ways of developing robust and effective verification, using the UNSCOM and UNMOVIC regimes as case studies. In this process I am hoping to interview participants from all aspects of UNSCOM and IAEA's work in Iraq, and was wondering whether it would be possible to arrange an interview? If this is at all possible this would be of immense value for my search! I am based in London and I am very flexible.

NG A 10/757

My research is funded by the Norwegian Institute for Strategic Affairs, and I will pursue this theme in my professional research commitments upon the completion of my MSc. I am focusing on how these regimes were developed in meeting verification challenges in a) the declarations (particularly after 1995) and b) OMV. I am looking at relationships between various control systems, and between main elements and control mechanisms within these systems. If you would like some more information about my project or about myself I will happily provide that!

yours sincerely
Målfrid Braut

Dear Målfrid,

Thanks for the update. I am sure that Terence Taylor and Pål Aas were fascinating. Remember me to Ambassador Ekeus when you see him.

NG A 10/757

I will try to fix a date to see you soon. April 3 (Thursday) may be possible.

Regards,

TRP/3/0037

David Kelly

ps

I forgot to mention that I am in
Oxford occasionally - my partner 'grew up'
at Balliol and has friends who
are still at Oxford. Might run into you there
if not before! ;-)

Målfrid,

Thanks for the update. I am
glad you had a good session with Ambassador

TVP/3/0038

Ekeus and look forward to hearing about it. Enjoy Cairo and I am sure that you will have some interesting views on Iraq there.

Best wishes,

David

Annwyl/Dear Dr Kelly,

the interview in the Hague was interesting. I am now on my way to Cairo for a Coptic Easter, so everything is standing on its head, but I will email you from there (Inshallah?) and tell you a bit about the interview (his perspectives on BW in the early years).
Until then, I wish you a happy easter!

Hwyl/bye
Málfrid

Annwyl Málfrid,

I am glad that you are safe in Cairo. It was hotter than Cairo in London yesterday but winter returned today!

Thanks for the information on attitudes towards the US regarding Iraq. There is considerable media news reflecting those views in the UK. It looks as though a large US team will inspect in Iraq in the next few weeks. It is not yet clear if there will be a UK contingent.

I look forward to hearing Ekeus's views. I think that he and both speak to the NATO parliamentarians in June so I should catch up with him then.

Enjoy Easter,

Hwyl

David

Dear Malfrid,

I am glad you are enjoying Cairo.

Rod Godfrey ^{Asst. Dir. Gen. Secy. Chemical} was responsible for chemical weapons particularly the process equipment. John Harlow is a missile expert - the only real rocket scientist I know!

Subject: Godfrey and Harlow

Hello,

Cairo is still lovely - I have decided to spend the latter half of May here when I will be revising for exams. It will probably be nice to leave LSE at that time as the (currently rising) level of adrenaline and stress amongst my fellow students is something I am not particularly keen on ;-)

I am looking forward to writing up the analysis this summer, and before that I am looking forward to getting as much interwieving done as I possibly can relating to the OMV. I am speaking to Pl Aas again in a few days, and hope he can suggest some other names in relation to OMV in case I can't get hold of the ones I am trying at the moment.

I am now trying to get in touch with Rachel Davies, Horst Reeps and others regarding OMV. I will try again in a few weeks time if I don't hear anything. I want to contact Godfrey and Harlow as you suggested, but I wasn't entirely sure what their roles were and just wanted to confirm with you before I contact them. Is it correct that Godfrey was an inspector focusing on NW/BM's and that Harlow had expertise in the Chemical weapons area? Were they both part of UNSCOM?

I hope all is well with you!
Malfrid

Dear Malfrid,

Good to hear that Cairo treats you well.

I am sure that you will derive much from your talks with Gabriele and Cees - please remember me to them. N 66 A 112757

n 65 A 111707

I am uncertain whether I will be in the UK on the 19th and 20th May but I think that my overseas project may slip so I could well be available then.

I am in Washington until May 8th.

With best wishes,

David

Subject:

hello,

how are you? I hope things are going well. It will be interesting to watch the developments in Iraq over the next weeks! Although I suspect the WMD issue will be more comprehensively covered in Europe than in Egypt (news papers online is a great invention).

I will be speaking to Dr Kraatz-Wadsack and C Wolterbeek over the next 14 days, which I look forward to! I was wondering whether it would be possible to speak to you - perhaps in late week 20 or on 19.5? (I will be going to Egypt again on the 20.5.) If this is inconvenient I will try again in mid-June.

The semester is at its busiest now, so my UNSCOM work is restricted to these interviews. I am very much looking forward to doing my in-depth analysis this summer, and particularly to hear what you think of it.

Best wishes,
Mlfrid

Hello!

I hope things are going well! What side of the Atlantic are you on?

I have managed to get hold of Nikita Smidovich and will call him tomorrow - I am very pleased!! I just wanted to let you know.

Malfrid,

You are right it is exceptionally busy. Spent a couple of days in Baghdad last week and will go back for a few weeks shortly. I will be out of email contact when in Iraq so I may take a while to respond to any draft but I will look at it whenever I can.

Enjoy summer in Cairo,

Best wishes,

David

hello,

I hope things are going well - I imagine you have been very busy lately! I hope work has been interesting - these are certainly interesting times..

I have now moved to Cairo for summer. Most of my exams are out of the way (al-Hamdulillah!) and I can devote my full attention to writing up the dissertation. I will work on this for the next few weeks, and will let you know how things are going. When I have a draft I will send it to you - I would really appreciate any comments, corrections or suggestions you may have!

Until then, I wish you a good summer.

Best

Mlfrid

Malfrid,

Thanks. It has been difficult. I hope to get to Baghdad soon to really work. I will then probably be out of email contact but send me whatever you wish and I will respond as soon as I can.

I am sure that Cairo remains absorbing.

Best wishes,

David

hello,

I just wanted to send a little email to say that I hope you manage to keep energy for your important work, undoubtedly recent events must have been straining.. seems to be an occupational hazard associated with UNSCOM work..?

In Cairo things are fine. I am getting close to a draft, if you have email access (I will check first) I will send you the draft, alternatively I will send you a later version when you do have email access. (I think it should have some value but undoubtedly it will benefit from critical reading in case I have misunderstood or misinterpreted.)

Best wishes,
Mlfrid
